

MATOC Solicitation 07-0008-01
Questions and Answers

Question #1

We are a current holder of a MATOC Contract for a different CLIN. We are interested in bidding on Technical, Programmatic and Engineering Support Services (CLIN 0008) T.O. 07-0008-01. Can we bid on this if we are not currently approved under this CLIN? If not, how do we get approved?

Answer: No. Request for Proposal (RFP) Number N00014-06-R-0006 provides for the issuance of multiple-award task order contracts (MATOC) through 30 SEP 2009 (including the options years). The purpose of the standing solicitation is to incorporate new contractors who offer unique or specialized capabilities beyond those available from the current MATOC contractors. Therefore, you may go to http://www.onr.navy.mil/02/matoc/05_09/standing.asp and upload a proposal for consideration. However, the evaluation process will not be completed prior this MATOC Solicitation's closing date.

Question #2

Are the two existing prototypes functional? If not, do they require Non-Government Furnished Equipment investment (aka Contractor Furnished Equipment)?

Answer: One is functional. The second will be functional no later than 2 January 2007 with the following exceptions: the TALINN INS and KG-250 require repair. Repair of these two components and any other currently unknown minor items is estimated to cost less than \$50,000. We expect this to be paid for under the equipment ODC allowance under the awarded task order.

Question #3

Can government facilities be used to store the prototypes on-site in HI when the systems are not being demonstrated? If so, are there costs associated?

Answer: The Government would prefer to store the vehicles at Marine Corps Base Hawaii, Kaneohe Bay; and there will be no associated costs to the Contractor for this storage.

Question #4

When we bid the MATOC contract we used both direct and indirect rates that now are 2 years old. In bidding for this current solicitation, I am assuming that we will be able to use reasonable escalation rates to apply to the direct labor rate and use our current DCAA approved indirect rates? Please confirm.

Answer: Offerors should bid their current DCAA approved direct labor and indirect rates. The Government will be verifying proposed rates with DCAA.
